

Cleaning products

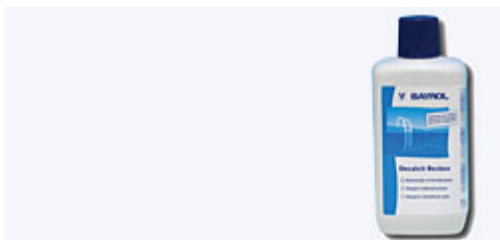

Swimming pools are (especially in the winter months) constantly exposed to large dirt particles. This is why thorough cleaning is especially indispensable in spring. A range of highly effective products is available to produce the desired cleaning success.

[Details about Randfix® / Bordnet Spray](#)

Bordnet Care Set

Set with Randfix viscous, alkaline cleanser, 1 litre and a special brush with a microfibre layer for cleaning the pool edges.

[Details about Bordnet Care Set](#)

Filter care for better water quality

A swimming pool filter provides the ideal breeding ground for germs, especially when the circulation pump is not working. It is always warm and damp, plenty of organic material and micro-organisms end up in the filter where they multiply explosively. The result: Insufficient water quality and a loss of disinfection capacity of up to 20 %.

Investigations have shown that about every second filter is contaminated or dirty. Where filters are contaminated and/or dirty, problems with the water quality are virtually pre-programmed. There is now a solution: FilterShock Tab and Filterclean Silver, the top innovations from BAYROL.

FilterShock Tab

Tablets for disinfecting and cleaning filters.

Package size: 1 kg can

[Details about FilterShock Tab](#)

Activated FilterGlass NEW!

Innovative media for an improved filter performance. Advanced filter media manufactured from recycled glass which has gone through a special treatment process to ensure effective filtration resulting in crystal clear water.

Package size: 25 kg Sack
