

Water disinfection with chlorine

Conventional disinfection with chlorine does not just kill germs, but also eliminates non-filterable organic impurities through oxidation. The development of stabilised chlorine products (Chlorilong, Chloriklar, Chlorifix) has made chlorine easier to handle and the available chlorine is better exploited.

The advantages of solid chlorine products

- High active chlorine content
- Dissolves completely without leaving any residues
- Does not affect the pH
- Stabilises the free chlorine available in the water in strong sunlight and high water temperatures

VariTab®

Care Steps contained:

- 
- 
- 

The first 2-phase tablet in the world which combines impact chlorination and long-term chlorination in one product. It also cleans and disinfects the filter, and removes turbidity.

Package size: 1.2 kg carton, 4.5 kg carton

COMPLETE

Care Steps contained:

-
- 
- 
- 

COMPLETE is the complete swimming pool care product in concentrated granular form that disinfects, prevents algae and clears the water.

Package size: 1,12 kg carton, 4,48 kg carton

[Details about COMPLETE](#)

Multilong

Complete care for swimming pools of up to 30 m³ that use sand filters. Three functions in one package: Continuous disinfection with slowdissolving chlorine, algae prevention (foam-free), and turbidity removal flocculation agent.

Package size : 4 kg cardboard box = 4 cartridges of 1 kg each

Chlorifix Compact

Care Steps contained:

-
- 

Fast-dissolving chlorine granules. Eliminates algae and helps immediately against green or turbid water.

Package size: 1.2 kg carton

Details about Chlorifix Compact

Chlorifix

Care Steps contained:

-
- 

Fast-dissolving chlorine granules. Eliminates algae and helps immediately against green or turbid water.

Package size: 1 kg can

Details about Chlorifix

Chlorifix SPA

Fast-dissolving micro-pellets for rapid disinfection of whirlpools.

Package size: 1 kg can

Details about Chlorifix SPA

Chloriklar®

Care Steps contained:

-
- 

Fast dissolving disinfectant tablets (20 g) chlorine-based.

Package size: 1 kg can, 3 kg bucket, 10 kg bucket

Details about Chloriklar®

Chlorilong®

Care Steps contained:

-
- 

Slow dissolving chlorine-based disinfectant tablets (200 g).

Package size: 1 kg can, 3 kg bucket, 5 kg bucket, 10 kg bucket

Details about Chlorilong®

Chlorifix X 100

Slow-dissolving, stabilised chlorine granules made of trichlorisocyanuric acid with a high active chlorine content. Residue free, calcium free. For algae elimination and continuous disinfection

Package size: 20 kg bucket

Chlorilong 5 Functions

Slow-dissolving, stabilised chlorine tablets made of trichlorisocyanuric acid and other components with a high active chlorine content. Residue free, calcium free.

With multifunctional properties.

5 functions:

- continuous disinfection
- algaecidal effect
- clarifier
- hardness stabiliser
- chlorine stabiliser

Package size: 5 kg bucket

ChloriLiquide

Liquid disinfectant for continuous chlorination.

Package size: 25 kg canister, 35 kg canister

Details about ChloriLiquide

Minipool Set

Care Steps contained:

-
- 
- 
- 
-

Chlorine-based water care product for small pools, with algicide.

Package size: 1 kg carton

Details about Minipool Set
