

COMPLETE

COMPLETE is the complete chlorine-based swimming pool care product in concentrated granular form. Contains agents for reliable disinfection, algae prevention and clearing the water. The practical double dosage pouches means you no longer have to deal with the inconvenient handling and dosage of the separate care products. The special feature: In this recipe, 40 % of the chlorine has been replaced by alternative highly effective agents. Result: The same high level of disinfection and clear water with less chlorine.

Always use biocides safely. Always read labels and product information carefully before use.
