

BayroSoft®

The intelligent combination product for chlorine-free disinfection/oxidation and algae prevention (foam-free). Now even more concentrated with synergetic substances. Ready-to-use for automatic dosage into the swimming pool straight from the canister. Fully automatically provides for perfect and naturally soft swimming pool water. Also contains a hardness stabiliser to combat lime precipitation.

For measuring the pH and BayroSoft content you will need the BayroSoft QuickTest strips (see water analysis). Dip the test strips briefly into the water and compare against the colour chart on the test tube.

Use biocides safely. Always read labels and product information carefully before use.
