

Soft & Easy

Soft & Easy is the complete granular swimming pool water care product. It contains all the agents for reliable disinfection, algae prevention and water clearing. Combines three care steps with one flick of the wrist.

Soft & Easy contains two algicide agents. This effective combination covers a broader spectrum of algae (broadband effect) than usual agents. This makes Soft & Easy an all-round agent against algae.

The product is pH-neutral, but contains special substances for pH buffering to compensate for great fluctuations. The newly included hardness stabiliser combats lime precipitation.

1 dosage bag is sufficient for 20 m³ water. It is added straight into the pool.
