

TECHNICAL DATA SHEET

CALCINEX®

2-IN-1 SCALE & METAL SEQUESTRANT

Prevents scale deposits and stains

WATER BALANCE

ADVANTAGES

- Long-lasting effectiveness
- Ideal for well water or hard water
- Prevents the formation of limescale
- Does not affect the pH of the water
- Protects equipment from limescale
- Phosphate-free
- Prevents metal deposits and stains on liners

PRODUCT FUNCTION

Prevention of limescale.

Calcinex® prevents limescale build-up and stops metal stains from appearing in the pool. Calcinex® remains stable in the presence of chlorine, bromine or active oxygen. When used in soft water Calcinex® will limit corrosion problems.

PRODUCT DESCRIPTION

Liquid.

Suitable for all treatment methods.

Contains: 2-phosphonobutane-1,2,4-tricarboxylic acid (CAS N°37971-36-1)

Available size: 1 L

DOSING INFORMATION

Filter type: All	When: After filling. If necessary.
Water volume: All	
Where: Into the water	Dosage: 300 ml / 10 m³

APPLICATION

- Add 300 ml per 10 m³ of CALCINEX® directly after filling the pool with fresh water, when pump is running.
- If the water temperature is over 28° C, we recommend to increase the dosage by 50 %.
- Depending on the amount of fresh water added and after backwashing the filter, an additional dose is required.

Find all the information about this product on our website

IMPORTANT RECOMMENDATIONS

The filtration system must run every day (for at least a period equal to half the water temperature). If the water temperature exceeds 28 °C, it is recommended that the dosage be increased by 50%.

WARNINGS

CALCINEX® works as a preventative measure against water discolourations caused by metal ions. Already existing discolourations, respectively precipitated metal ions cannot be removed with CALCINEX®.

Never mix different chemicals in their concentrated form. Always add the product to the water, and never the other way round.
