

TECHNICAL DATA SHEET

CHLORILONG® ULTIMATE 7 TABS

CHLORINE 7-IN-1

Fully treats water & filter: disinfection + flocculation + anti-scale + anti-algae
+ stabiliser + filter shock action + pool shock action

2 DISINFECTION

ADVANTAGES

- **BAYROL Treatment No. 1 Two-Phase Tablet**
- **The ultimate pool treatment**
- **Integrated intensive disinfection of the filter and pool**
- **Contains two chelating agents: unrivalled swimming comfort**
- **Stabilised product: protects chlorine from being broken down by UV light**
- **A.P.O.® Technology: slow and steady dissolution**
- **Clorodor Control® capsule: less chlorine odour when opening the bucket**
- **Copper sulphate-free, does not stain surfaces.**

PRODUCT FUNCTION

Kills bacteria and removes impurities.

Chlorilong® ULTIMATE 7 is a dual-phase, 7-in-1 chlorine tablet designed for thorough and consistent disinfection of the pool and filter. The blue layer dissolves quickly, providing a shock treatment for the pool and filter. The white layer dissolves slowly and steadily, offering continuous disinfection, algae control, water clarification, limescale prevention and chlorine stabilisation.

It is produced using an innovative compression method known as A.P.O.® technology. This process produces high-quality tablets that ensure a uniform release of chlorine and maintain a constant level of disinfectant in the pool water.

PRODUCT DESCRIPTION

300 g two-phase tablets. Blue layer (100 g) with rapid dissolution, white layer (200 g) with slow dissolution.

Contains: Symclosene (698,15 mg/g, CAS N° 87-90-1), sodium dichloroisocyanurate dihydrate (197,67 mg/g, CAS N° 51580-86-0), aluminum sulfate 14-hydrate (CAS N°16828-12-9)

Product free from boric acid

Available size: 4.8 kg

APPLICATION

- Backwash first and then add the tablet directly in the skimmer with filtration on during at least 4 hours.

Phase 1:

- The blue layer dissolves after a few minutes. It guarantees a shock chlorination and removes filter impurities.

Phase 2:

- The white layer dissolves over 7 to 10 days (*The dissolution speed may vary and is highly dependent on pump running time and water temperature).

WARNINGS

Never mix different chemicals in their concentrated form. Always add the product to the water, and never the other way round.

Never apply CHLORILONG® ULTIMATE 7 tablets directly into the pool to prevent bleaching spots. Avoid direct contact with non chlorine resistant materials. If dosing dispenser is used, remove it from the pool during swimming. Not suitable for use in a tablet feeder.

IMPORTANT RECOMMENDATIONS

The filtration system must run every day (for at least a period equal to half the water temperature). In hot weather or when the pool is in heavy use, larger amounts of chlorine may be required.

DOSING INFORMATION	
Filter type: Sand filter / glass filter	pH: Between 7.0 and 7.4
Water volume: From 20 m³	Chlorine: Between 0.5 and 1 mg/L
Where: In the skimmer	Dosage: 1*300g tablet = 20-30 m³
When: Every 7 to 10 days*	

*The dissolution speed may vary and is highly dependent on pump running time and water temperature

Use biocides safely. Always read the label and product information before use.
