* From the BAYROL range

PRODUCT FUNCTION

Swimming pool cleaning.

Decalcit Super removes stubborn limescale and rust deposits, as well as deeply ingrained stains from the walls of swimming pools.

PRODUCT DESCRIPTION

Descaling cleaner.

Contains: Hydrochloric acid ($10 \leq x\% < 25$) (CAS N° 7647-01-0), Cationic surfactants ($<5\%$), Perfumes
Available size: 3L

IMPORTANT RECOMMENDATIONS

Before use, test on a small area. Do not use this product on materials that are not resistant to acidic products (e.g. aluminium, untreated enamel, etc.). Do not allow the product to remain on chrome-plated parts; if it comes into contact with chrome, rinse immediately with plenty of water. Ensure the area is well ventilated during and after application. Wear suitable personal protective equipment. Never mix different chemicals in their concentrated form. Always add the product to water and never the other way round.

APPLICATION

- Depending on the degree of soiling, use a 1:5 dilution ratio (2 L for 10 L of water) up to its undiluted form, and apply cleaner on the surfaces to be cleaned with a brush or a scrubber.
- Let it work for 10 to 15 minutes and thoroughly rinse with plenty of water. If necessary, repeat procedure.
