

TECHNICAL DATA SHEET

DESALGIN® JET

NON-FOAMING ALGAECIDE

Prevents the growth of all types of algae and clarifies the water

3 ALGAE PREVENTION

ADVANTAGES

- Ideal for use with swim jets and water features
- High performance & long-lasting
- Built-in clarifying effect: makes the water crystal-clear
- Contains no metals: safe for surfaces
- Preventive action and long-lasting effect against algae

PRODUCT FUNCTION

Algae prevention.

Desalgin® JET is a concentrated algae control product. It prevents the growth and spread of algae. Non-foaming and water-clarifying, Desalgin® JET is particularly suitable for swimming pools with counter-current systems or those with high water circulation.

PRODUCT DESCRIPTION

A low-foaming, pH-neutral concentrated liquid.

Compatible with all products and processing methods.

Contains: Polymer of N-Methylmethanamine with (chloro methyl)oxirane (225 mg/g; CAS N° 25988-97-0)

Available sizes: 1 L / 3 L

APPLICATION

Pre-treatment:

- To create a protective layer against algae growth, prepare a solution of 200 ml of DESALGIN® JET per 10 L of water, apply on pool walls and floor and let dry.

Initial dosage:

- Add 150 ml of DESALGIN® JET per 10 m³ directly into the pool water.

Weekly dosage:

- Add 50 ml of DESALGIN® JET per 10 m³. In case of increased bather load, thunderstorms and higher temperatures, increase the dosage up to twice the normal weekly quantity.

DOSING INFORMATION

Filter type: All	When: Weekly
Water volume: All	Dosage: 50 ml / 10 m ³
Where: Into the water	

IMPORTANT RECOMMENDATIONS

DESALGIN® JET is a pure preventative measure against algae growth.

In case of an algae infestation, carry out a shock chlorination with CHLORYTE® or CHLORIFIX®.

Water treated with this product must not be discharged into groundwater or surface water.
