TECHNICAL DATA SHEET

SOFT & EASY

WEEKLY CHLORINE-FREE TREATMENT

Disinfects, fights algae, and clarifies the water

4 1
3 2

DISINFECTION

ADVANTAGES

- 3-in-1 treatment: enhanced anti-algae action
- For softer, odour-free water
- Complete treatment in a single step
- pH stabiliser
- Easy and safe dosing thanks to the sachets
- Immediate action
- Chlorine-free
- Built-in flocculants and anti-algae agents

PRODUCT FUNCTION

Disinfection.

Soft & Easy is a comprehensive, easy-to-use pool treatment. Formulated with active oxygen, it provides a week's worth of chlorine-free treatment, combating algae and clarifying the water. Its formula, which includes a hardness stabiliser, prevents limescale build-up.

PRODUCT DESCRIPTION

Sachets of fast-dissolving granules.

Bag 1: Pentapotassium-bis (peroxymonosulphate)-bis(sulphate) (1 g/g, CAS N° 70693-62-8)

Bag 2: Aluminum sulfate 14 – hydrate (CAS N° 16828-12-9), Polymer of N-Methylmethanamine with (chloromethyl) oxirane (60 mg/g, CAS N° 25988-97-0))

Available sizes: 4.48 kg / 5.54 kg

IMPORTANT RECOMMENDATIONS

The filtration system must run every day (for at least a period equal to half the water temperature). It is best to do this in the evening after swimming.

In hot weather or when the pool is in heavy use, double the quantities. Always empty both parts of the double sachet completely. Soft & Easy is compatible with chlorine; if the water is very cloudy, or if there are algae or surface deposits, a shock chlorination treatment is recommended (e.g. Chloryte®). A shock chlorination treatment is also recommended at the start of the season or when adding large amounts of water.

APPLICATION

- Check the pH value with BAYROL O2 Pooltester or the BAYROL ELECTRONIC POOLTESTER II and, if necessary, adjust to the ideal range of 7.0 to 7.4.

Weekly dosage:

- Apply one double sachet of SOFT & EASY per 30 m³ directly into the pool. In case of elevated water temperatures and/or heavy bather load, double the dosing quantity.

Initial dosage:

- Cut open with scissors and apply two double sachets of SOFT & EASY per 30 m³ directly into the pool in front of the inlets and with the circulation pump running.
- Measure the oxygen value within maximum 2 hours after dosing with the BAYROL O2 Pooltester or the BAYROL ELECTRONIC POOLTESTER II. Should the value be below 8 mg/L, apply another double sachet.

WARNINGS

After each use, close the bucket carefully with the lid. Do not store sachets outside the bucket. Always dose the entire content of the sachet.
